Mr. A.J. Fiksdal, Manager  
Energy Facility Site Evaluation Council  
P.O. Box 43172  
Olympia, Washington 98504-3172

**ENERGY FACILITY SITE  
EVALUATION COUNCIL**

**Subject: NUCLEAR PROJECTS NOS. 1 AND 4  
REVISED SITE RESTORATION PLAN**

- References:**
- 1) Letter GO1-95-012 dated March 8, 1995, WG Council (Supply System) to FS Adair (EFSEC), "Nuclear Projects 1, 3, 4, and 5 Site Restoration Plan"
  - 2) Letter dated June 15, 1995, JJ Zeller (EFSEC) to WG Council (Supply System), "Nuclear Projects 1, 3, 4, and 5 Site Restoration Plan" (EFSEC Resolution No. 280)

In Reference 1 the Supply System (now Energy Northwest) submitted a site restoration plan for its terminated nuclear power plant projects. In Reference 2 EFSEC approved the plan and noted that there were a number of uncertainties associated with the restoration work proposed in the plan. Accordingly, the Council conditioned its approval on conducting more detailed reviews as additional information became available and Energy Northwest was able to finalize its plans.

Since that time, new cost-benefit information and recent economic development strategies have been used to prepare a revised restoration plan for WNP-1 and WNP-4 (attached). Approval is not being requested at this time since the plan is contingent upon funding approval from BPA and concurrence by the landowner (USDOE). However, the plan is being submitted for EFSEC review to address the Council's concern for progress in the development of a revised plan. Energy Northwest is interested in meeting with the Council to discuss its comments following the completion of its review.

Should you have any questions or desire additional information regarding this matter, please contact W.A. Kiel at (509) 377-4490.

Respectfully,

A.E. Mouncer (Mail Drop 1396)  
General Counsel
